

LIN WOOD is an innovative system of multiple seats, designed to inhabit high-traffic indoor public spaces. With a refined and timeless design, the collection is completely modular and allows multiple configurations to be created.

The structure and arms are entirely made of aluminum alloy, a sustainable material which allows the creation of resistant and light benches, that have a minimal maintenance and are 100% recyclable. Using intermediate legs and connection tables, the system allows the configuration of benches with different shapes and infinite length. The combination of aluminum, wood and upholstery allows the creation of benches with high performance that are comfortable and welcoming, providing at the same time warmth to the spaces where they are located.
